
HOW LARGE CAN WE GO?

Enlargement of the ringway around Brussels? No thanks!

An enlargement of the ringway around Brussels (R0) will only lead to more traffic, more polution and more nuisance. Moreover, the extra lanes would especially have to facilitate the extra trucks that will be attracted by the logistic investment plans of the Flemish government. Undersigned do not agree with even more logistic activities and the building of extra lanes on the R0. We demand measures that tackle the congestion problems in a sustainable way and that lead to less cars and trucks on the road. **More info (dutch/french): www.modalshift.be**
